### **EXAMINER'S COMMENTS**

#### ***Examiner's Amendment***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Tom Boshinski on March 20, 2006.

2. The application has been amended as follows:

Claims 12, 13, 16-18, and 20 are cancelled.

3. Applicant authorizes a three-month extension of time to be charged to account: 13-2512.

*Reasons for Allowance*

4. The following is an examiner's statement of reasons for allowance: the prior art could not alone or in combination anticipate or make obvious

Claims 1, 2, 4-6, 10, and 19 are treated as means plus function claims and the prior art could not alone or in combination anticipate or make obvious a packaging machine in which a means for separating groups of articles creates sub-groups of articles, a means for carton erecting comprising complementary die members on rotating wheels with each die member engaging a carton blank between them and forming receiving cells in the carton, loading means for loading the subgroups of articles into the receiving cells.

The closest pertinent prior art, DIETRICH ET AL, discloses erecting/loading cartons, but not dividing the articles into subgroups.

Claim 8 is allowed because the prior art could not alone or in combination anticipate or make obvious a mechanism for forming a carton including a pair of article receiving cells, the mechanism comprising complementary die members, each die member being mounted on a rotating wheel with each die interengaging when a blank is positioned between the die members and to cause the blank to be folded to define the article receiving cells, one die having a protruding portion and the other die a recessed portion to receive said protruding portion.

The most pertinent prior art, MONCRIEF, disclose an apparatus for forming cartons, but each of the dies is not mounted on a wheel. Also, Fig. 5 of MONCRIEF shows that dies (36, 62) do not actually mesh together.

Claim 22 is allowed because the prior art could not alone or in combination anticipate or make obvious an apparatus for orienting an article with a protruding portion, the apparatus

Art Unit: 3721

comprising a channel acting as support for the article, an elongate member to cause the article to rotate in the support until the protruding portion of the article is restrained by an abutment.

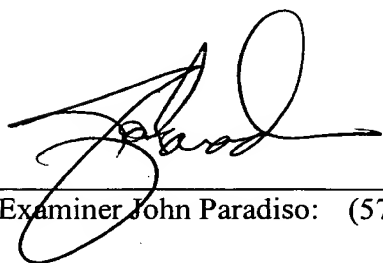

The most pertinent prior art, KONTZ, discloses an apparatus for orienting an article, but does not disclose a channel as the support with an elongate member to cause the article to rotate in the support until the protruding portion of the article is restrained by an abutment.
